

A RESOLUTION FOR A COUNTY OF HAWAII ORDINANCE EXTENDING THE HAWAII REVISED STATUTE, TITLE 19, DEPARTMENT OF HEALTH, GRANTING RELIGIOUS EXEMPTIONS FROM FLU VACCINATIONS, RECOGNIZING THE DECLARED PANDEMIC, AND DANGER OF A LOCAL EPIDEMIC FROM SEASONAL, H1N1 AND H5N1 INFLUENZAS

WHEREAS, Hawaii Revised Statutes, Title 19, Department of Health, Chapter 321, Section 11, Subjects of Health Rules, states: " No child shall be subjected to . . . vaccination, revaccination, or immunization, whose parent or guardian objects in writing thereto on grounds that the requirements are not in accordance with the religious tenets of an established church of which the parent or guardian is a member or adherent. . . .no objection shall be recognized when, in the opinion of the department, there is danger of an epidemic from any communicable disease;" [HRS §321-11 (2005 Cumulative Supplement)];

WHEREAS, the United States Constitution is the law of the land, and any law, including state law, which is inconsistent with the US Constitution is superseded by the US Constitution;

WHEREAS, Constitutional Amendment I states that Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; Amendment IV secures the right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures; and Amendment V states, that "No person shall be . . . deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation; and Amendment XIV, Section 1, guarantees that "no state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any state deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws."

WHEREAS, proposed swine flu live viral vaccines are neither adequately tested nor proven safe or effective;

WHEREAS, the health and natural immunological adequacy of the human body represents private property not to be taken or compromised for "public use, without just compensation" respecting the U.S. Constitution;

WHEREAS, stockpiled flu vaccines contain many certified toxic ingredients including mercury, and squaline adjuvants, scientifically linked to neurological and immunological diseases; and animal tissues, viral proteins, and genetic materials from various species of germs and culture media that certainly prompt autoimmune diseases in many persons as well as raise cancer risks;

WHEREAS, live viruses used in swine flu vaccines can easily mutate to become more deadly causing unpredicted diseases and contagion that can spread from vaccinated persons to others vaccinated or unvaccinated;

WHEREAS, world leading virologists and genetics experts have concluded the swine flu currently circulating was laboratory generated; even possibly designed to have its damaging

impact on people amplified by circulating seasonal flu viruses, or others “accidentally” released from laboratories as reported in the national news, including the H5N1 “avian flu” virus spread by Baxter, Corporation to 18 European nations;

WHEREAS, the unprecedented Department of Health’s 2009 flu response plan calls for people, especially children, to receive three or four different live flu virus vaccines simultaneously, contraindicated by scientific evidence, not proven safe or effective, violates common sense, and is especially dangerous considering expected recombinations of new laboratory-engineered live flu viruses in these vaccines mutating with other viruses resident in the human body at the same time (e.g., seasonal influenza) potentially gaining lethality, and/or undermining natural immunity, and producing more diseases in people locally and globally;

WHEREAS, Federal officials classify the bird flu virus (H5N1) as a “biological weapon,” and consider this, and potentially the swine flu recombining with the avian flu, a “national security” risk; and have placed the Central Intelligence Agency (CIA) above all Federal agencies coordinating emergency responsiveness for “biodefense;” and

WHEREAS the CIA operates covertly and largely on behalf of large multi-national corporations, including those financed by the Carlyle Group, according to the Congressional Record and expert testimony in national headline news reports;

WHEREAS, officials influencing CIA covert operations, including past CIA director and past President George H.W. Bush, and his Secretary of Defense, Donald Rumsfeld, hold obvious conflicting interests in the Carlyle Group with persons and companies associated with swine flu vaccine and Tamiflu manufacturing; and

WHEREAS, Federal officials have grossly neglected approximately 15 million American children, and as many as 60 million adults, receiving psychotropic drugs for phobias and depression, illnesses made worse by repeated widespread rebroadcasting of swine flu death warnings using statistics that pale by comparison to normal seasonal flus;

WHEREAS, Federal officials are implicated for conspiring with drug industrialists to abuse the news media to increase demand and sales for flu vaccinations through fear as explicitly revealed in a classified publication of the Centers for Disease Control (CDC) that sponsored a conference for vaccine manufacturing executives entitled “7-Step Recipes to Increase Demand for Flu Vaccination;”

WHEREAS, the best ways to be protected from any flu are grossly neglected by Federal and State officials, including nutritional and lifestyle behaviors in addition to simple hand-washings or mask-wearing that naturally boost healthy immunity;

WHEREAS, persons who refuse swine flu and regular flu vaccines in 2009, and thereafter, may be threatened with arrest, imprisoned, or held indefinitely in internment camps established by FEMA for so-called “quarantine,” with no liability whatsoever of health officials, or “deputized” emergency responders, for any harm that may be caused to persons or property resulting from these officials’ actions;

WHEREAS, Federal and State health officials are intending to accept command from World Health Organization (WHO) officials, representing a foreign institution heavily influenced by certain pharmaceutical industrialists, to use international law to justify American martial law;”

THEREFORE, due to:

- 1) the un-American unconstitutionality of forced vaccinations that compel people to violate bible laws and their religion convictions;
- 2) vitally important natural immunity that is degraded by repeated doses of chemicals, heavy metals, and biological intoxications from multiple vaccinations;
- 3) insufficient scientific evidence proving flu vaccine safety or efficacy;
- 4) obviously conflicting financial interests among influential political and corporate entities promoting the psychosocially debilitating, even deadly, 2009 flu fright and multi-vaccination preparations;
- 5) the unprecedented problematic nature of administering multiple flu vaccines simultaneously, risking more deadly pandemics as a result expected mutations; and
- 6) robbing people of the freedom to choose to vaccinate or not, quarantine or not, or risk losing their health and God-given gift of natural immunity against diseases, or not, without adequate compensation for damages, loss of property, life, liberty, or the pursuit of happiness required under the US Constitution, that supersedes Federal and State statutory laws.

BE IT RESOLVED that the County of Hawaii Council extends the right to exercise religious freedom, as per the Hawaii Revised Statutes, Title 19, Department of Health, Chapter 321, Section 11 health rules, to exempt religious families, by their choice and declaration of religious conviction, from the 2009 Flu vaccination program, suspending the obligatory statement therein pertaining to a health official’s declaration of epidemic or pandemic for this swine flu season.

Background Information and Discussion

Potential Vaccination Risks:

1. THE PROPOSED SWINE FLU LIVE VIRUS VACCINATION IS NEITHER ADEQUATELY NOR SUFFICIENTLY TESTED, NOR PROVEN, EFFECTIVE, OR SAFE.

At issue is what we consider the serious deception and general misinformation about the safety of an impending swine flu vaccine that is neither adequately tested nor safe, although the so-called “researchers” have publicly declared it safer than the regular flu vaccine before even starting their one-week of testing. The regular flu vaccine was anything but safe. There were 8,364 adverse reactions to the flu vaccine reported to the federal government in 2007 and 2008. VAERS is a passive reporting system, notorious for under-representing true reaction rates. Passive reporting systems may capture just 1 percent or less of true damage to recipients of pharmaceutical drugs (as noted by David Kessler, former head of the FDA). Based on the VARES data, we have calculated that there is an average of 850,000 life threatening, life crippling side effects, or deaths associated with all vaccinations given per year based on an extrapolation of the CDC data.

The new swine flu live virus vaccine could be more dangerous than "seasonal" flu vaccines because some of them are using new technologies, and all of them are being fast-tracked, reducing testing periods and safety requirements before licensing will occur. The doctor responsible for overseeing the trials has already claimed the shot is "really as safe, actually if not safer," than previous flu vaccines. That's a curious statement considering he is still recruiting test subjects and the trials have not yet begun. This is anything but a scientific attitude and certainly does not inspire confidence in what results are found—especially if they are already predetermined.

Our interest is that you have enough valid scientific data to make an informed choice in the best interest of yourself and your children.

2. THE SWINE FLU VACCINE CONTAINS DANGEROUS & LIFE-THREATENING FILLERS: ADJUVANTS, ANIMAL TISSUES, VIRAL AND BACTERIAL PROTEINS, AND LIVE VIRUSES.

What is in this injection seriously concerns us. One of the most dangerous substances is squalene. There are over two-dozen animal studies that show squalene's ability to induce autoimmunity. Research at this point suggests squalene seems heavily associated with the debilitating and life destroying Gulf War Syndrome. There is a serious risk that the Gulf War Syndrome could break out amongst the general public who are vaccinated. Of course this autoimmune syndrome will not show up after one week of shame human vaccine trials, as will not autism, Guillain–Barre syndrome, and an assortment of autoimmune disorders including type 1 diabetes. In one study of over 100,000 vaccinated children in Finland, had an increased rate of

type 1 diabetes by 147%. The lack of sufficient testing on this experimental live virus vaccine raises many concerns. There are no criteria on its efficacy or valid statistics to speak of. During the 1976 swine flu scare, the swine flu vaccine itself killed hundreds & sickened countless others.

Author of Emerging Viruses: AIDS And Ebola: Nature, Accident or Intentional?, Dr. Leonard Horowitz says the swine-bird-human flu strain, reported to be found first in Mexico in late-March 2009, could have only come from Dr James S. Robertson and his colleagues in association with the US Centre for Disease Control and vaccine manufacturer Novavax, Inc, which was ready to profit from the release he says. Nobody else takes H5N1 Asian-flu infected chickens, takes them to Europe, extracts their DNA, combines their proteins with H1N1 viruses from the 1918 Spanish flu isolate, additionally mixes in some swine-flu genes from pigs, then reverse engineers them to infect humans, he said.

<http://uncensored.co.nz/2009/04/30/dr-horowitz-mexicanswine-flu-made-in-lab/>

LIST OF VACCINE FILLERS & ADJUVENTS: Officially administered by design with every vaccine provided to the public in addition to the squalene that appears to be in this upcoming Swine Flu vaccine, is of great concern to many parents or grandparents, with the announcement that they will start vaccinating children first.

In addition to the viral and bacterial RNA or DNA that is part of the vaccines, here are the fillers:

- Aluminum hydroxide - directly linked to causing Alzheimer's disease
- Aluminum phosphate - directly linked to causing Alzheimer's disease
- Ammonium sulfate - an inorganic chemical compound used a fertilizer and "protein purifier"; known to cause kidney & liver damage, gastrointestinal dysfunctions
- Amphotericin B - an "antifungal disinfectant" and anti-biotic, which damages the urinary tract, bowels, and heart functions
- Animal tissues (a causal element for all the various auto-immune diseases associated with vaccination): horse blood, rabbit brain, dog kidney, monkey kidney, chick embryo, chicken egg, duck egg, pig blood, Porcine (pig) pancreatic hydrolysate of casein (the pig protein/tissue is an additional objectionable issue for Jewish and Muslim people)
- Calf (bovine) serum & fetal bovine serum (cow blood is recognized as a significant transmitter of Mad Cow Disease)
- Betapropiolactone
- Formaldehyde - used as "a preservative & disinfectant", known to cause cancer, chronic bronchitis, eye irritation when exposed to the body's immune system
- Formalin
- Gelatin
- Glycerol
- Human diploid cells (originating from human aborted fetal tissue)
- Hydrolyzed gelatin
- Monosodium glutamate (MSG) - now known to cause cancer in humans, also linked to obesity

- Neomycin (anti-biotic)
- Neomycin sulfate (anti-biotic)
- Phenol red indicator - a highly toxic disinfectant dye, attributed to liver, kidney, heart & respiratory damage
- Phenoxyethanol (antifreeze) - proven to have extreme neurotoxic side effects
- Potassium diphosphate
- Potassium monophosphate
- Polymyxin B
- Polysorbate 20
- Polysorbate 80
- Residual MRC5 proteins
- Sorbitol
- Sucrose
- Thimerosal (mercury) - a neurotoxin linked to psychological, neurological & immunological problems—especially autism. Nervous system damage, kidney disease, birth defects, dental problems, mood swings, mental changes, hallucinations, memory loss, nerve damage and inability to concentrate can occur. Symptoms also include tremors, loss of dermal sensitivity, slurred speech and, in rare cases, even death and paralysis. This additive alone was the catalyst for another recent Class Action Lawsuit organized by mothers of children born with autism & the many related behavioral disorders associated with it. Autism is now occurring at levels never seen before in history; depending on the state, its rate is now 1 in 67 to 1 in 150. The average used to be 1 in 20,000. Mercury may also be associated with the significantly increased rates of senility and Alzheimer's, which is associated with five or more successive flu vaccinations. Although most mercury (thimerosal) has been removed from children's vaccines, it is still not safe in all flu vaccines at toxic doses, especially for children.
- Tri(n)butylphosphate,
- VERO cells, a continuous line of monkey kidney cells
- Washed sheep red blood cells

<http://articles.mercola.com/sites/articles/archive/2001/03/07/vaccine-ingredients.aspx>

THESE ADDITIVES ARE GIVEN TO OUR CHILDREN WITHOUT PUBLIC KNOWLEDGE OR CONSENT.

What's the problem with this horrendous looking list? The problem is two-fold: the adjuvants are added to increase inflammation and immune response in the system, but are significantly detrimental of the overall welfare of the organisms—including, according to the neurosurgeon, Russell Blaylock, M.D., an expert in this field, causing brain swelling and inflammation for up to two years. This alone would be enough to significantly disrupt the immune and endocrine systems, as well as increase senility, activate Alzheimer's, and other brain dysfunctions.

The mechanism, which is the explanation for these life-threatening autoimmune and inflammatory diseases, such as type 1 diabetes, severe rheumatism, Guillain-Barre, SIDS (sudden infant death syndrome), other autoimmune diseases, and death, is that all the animal tissues can set off an autoimmune response, which is the cause of all of these "diseases", which

attack various organs and tissues according to our genetic pre-disposition toward a particular inflammatory disease. What that means is these animal tissues are foreign antigens that the body responds to as antigens in an attempt to eliminate the foreign invaders. The immune system in essence creates an attack against these unhealthy invaders with our own antibodies. However, in the case of an autoimmune response, these foreign tissues create a cross reaction that end up attacking our own organ tissues that are similar to the animal tissues that were injected, such as the beta cells of the pancreas, the brain cells, and the myelin sheaths. These two factors combined with the danger of a live virus create a potentially lethal effect.

SO WHAT IS THE PROBLEM WITH LIVE VIRUSES?

3. LIVE VIRUSES HAVE A HISTORY OF LETHAL DANGER, DISEASE, AND ARE CONTAGIOUS. SECONDARY SPREAD OF LIVE VIRUS FROM THOSE VACCINATED WITH A LIVE VIRUS IS A WELL-KNOWN FACT.

We have to understand that live virus vaccines have a history of danger and disease, especially of the disease that is targeted. For example, the live polio flu vaccine virus that was used from 1979 – 2000 was pulled off the market because it itself was considered the major cause of polio and as such, Dr. Salk, the inventor of the vaccine, admitted this to be the case.

The contagious power of a live virus vaccine is no longer new information. It is scientifically recognized that an attenuated live virus vaccine can be contagious. The scientific term for this is called Secondary Transmission. Translated into common language, it means if all the children are vaccinated with a live virus, the adults who haven't been vaccinated are significantly more likely to pick up the live virus from being in contact with children. The current science has found those who are injected with a live virus vaccine are releasing the live virus from their bodies for up to three weeks, contrary to the inaccurate theory that everyone needs to be vaccinated to stop an epidemic, which is a false and unproven justification, the real danger is the opposite. The live virus vaccinated people can infect everyone else.

Another piece of important information regarding the danger of live viruses was an “informal” clinical trial of the avian flu live virus vaccine on about 200 Polish vagrants, which resulted in 11 immediate deaths and 20 subsequent deaths. This amounted to about 15% of the test population. The doctors and nurses involved were charged with murder. This factual event happened in 2008.

We also saw this lethal effect in the 1960s and 1970s when Australian Aborigine infants began to mysteriously die at astonishing rates—1 of every 2 babies after being vaccinated. Archie Kalokerinos, M.D. eventually made the connection when he realized the babies were dying after being vaccinated against pertussis and other diseases. Heath officials had recently initiated a mass vaccination program to “protect” Aborigine babies; their deaths corresponded with the program. He wrote a book called “Every Other One” documenting this tragic and preventable event in detail.

Although this is not a discussion about vaccinations in general, it obviously leaks over into this discussion; this is a specific discussion of what can be reasonably said are the dangers of live virus vaccines versus the benefits.

4. THE SWINE FLU WAS LABORATORY GENERATED AND DESIGNED TO: (1) HAVE NO ANTIDOTE AND (2) HAVE ITS NEGATIVE EFFECTS AMPLIFIED BY THE USE OF ALL THE POSSIBLE SWINE FLU VACCINES.

Although there are some valid humanitarian concerns, based on the pattern of the 1918 swine flu in which the flu came lightly in spring/summer and came back heavily in the fall, that may be fueling this push to vaccinate or go to prison consciousness, there are some very incriminating facts regarding the intentions behind this massive push. For example, Baxter International Incorporated was in the process of applying for supplying avian flu vaccinations to European countries in the event of an epidemic when they “accidentally” shipped live avian flu vaccines to 18 countries in Europe. A laboratory technician tested the Baxter Seasonal Flu vaccines sent to the Czech Republic and discovered that they were contaminated with a highly pathogenic version of the avian flu. The total amount of the pathogenic avian flu virus sent to these 18 countries was 72 kilograms. Because Level 3 precautions were in place, such contamination “could not have happened accidentally” according to experts in the field. In spite of this so-called “accident”, Baxter has been rewarded with a lead role in developing, producing, and disseminating the swine flu vaccine for the labeled grade 6 pandemic. It normally takes a minimum of 12-18 months to create a vaccine after a virus has been identified. Baxter laboratory, after receiving the seed culture of the swine flu virus that was provided in May 2009, announced that they would have the vaccine ready by July of 2009. One can’t help but question how they were able to do this in 2 months rather than the usual 12-18 months until we understand the reality of the situation, which is that the swine flu was an engineered laboratory generated virus, which contains several rare strains and H1N1 avian flu viruses, Spanish flu genomes, and swine flu genes, which could not occur naturally. This current swine flu is at best between 4-8% a match in terms of genetic material to its closest genetic relatives and there is no remotely close match in the public NIH databases. Aware of these insider facts, a significant number of virologists and other health professionals and scientists stated that this had to be produced in a laboratory and could not be produced naturally. This includes Adrian Gibbs, the inventor of Tamiflu who has gone on record stating that the very metrics (nucleic acid ratios) as well as genetic history indicates that this virus is passed through eggs, i.e.: it was created in a laboratory situation. Other whistle blowers include world famous virologist, author, and masters in public health, Dr. Leonard Horowitz who has actually identified the highly probable laboratory location and the highly likely scientists who created it. Former NIH employee Alexander S. Jones has done a genetic analysis using data from Andrew Rambaut at the University of Edinberg, which indicates that this virus is mutating approximately 2.3 times faster than any natural swine or avian flu virus has ever done. Although we do not have 100% evidence, for obvious reasons, the overwhelming proof is that this was a laboratory created virus.

5. THE UNITED STATES GOVERNMENT CLASSIFIES THE BIRD FLU VIRUS AS A BIOLOGICAL WEAPON.

Technically speaking, according to the United States government, in its own export regulations, the bird flu virus has been classified as a biological weapon. Given the evidence, this so called swine flu is a bioengineered virus and therefore a component of a biological weapons system as defined by Section 175(a) of the BWATA (Biological Weapons Anti-Terrorism Act of 1989). It is designed like the “bird flu” to “deliver toxins and microorganisms so to deliberately inflict disease and death on people, while being disguised as injections for prophylactic, protective, or other peaceful purposes.” In other words, the US accurately views live virus vaccines as potential tools for biological warfare, and in this context, restricts the export of untested, untried, and potentially lethal “experimental vaccines” as biological weapons to rogue nations. The obvious question is why would we attempt to force the same untested and untried potentially lethal live vaccine on to American citizens and particularly our children?

6. GOVERNMENT INTENT IS TO MAKE VACCINATIONS MANDATORY FOR ALL AMERICANS.

The push behind mandatory vaccinations for the swine flu has reached the highest level in our nation. Although this plan did not start with President Obama, for whatever good or bad intentions, he announced to the public that every man, woman and child should receive the vaccine this fall along with seasonal flu shots. For the record, Obama said he believes vaccinations should be mandatory. Upping this pressure to recklessly vaccinate with an untested live virus vaccine is at best irresponsible as even the statistical evaluation of the effectiveness of flu vaccines is questionable. In a scientific review of the data titled: Are US Flu Death Figures More PR Than Science?, it says: “CDC states that the historic 1968-9 “Hong Kong flu” pandemic killed 34,000 Americans. At the same time, the CDC claims 36,000 Americans annually die from flu.” Presently the swine flu has killed 400 people worldwide, which is a lot less than 36,000, yet there has been a major media fear/panic which preps the people to take this untested and potentially lethal flu vaccine without even a freedom of choice; after thought, an uninformed public is not readily acting with choice.

At this point it is seen to be mandatory for children and most likely will become mandatory for all Americans with refusal resulting in being put in internment camps.

The questions when considering any medical treatment is what are the risks versus the benefits, so we need to look at potential benefits to this or any other flu vaccine to make a reasonable risk-benefit analysis. It is already clear the risks are too high...are they balanced, or a secondary concern as compared to the benefits?

Potential Vaccination Benefits:

7. ANALYSIS FROM THE BRITISH MEDICAL JOURNAL ARTICLE ENTITLED INFLUENZA VACCINATION: POLICY VERSUS EVIDENCE SHOWS EVIDENCE FROM A SYSTEMATIC REVIEW BASED ON A METAANALYSIS OF ALL THE RESEARCH SHOW THAT INACTIVATED VACCINES HAVE LITTLE OR NO EFFECT.

The science by our own CDC (Center of Disease Control) shows that flu vaccines are somewhere between 0-14% effective. Research in Israel shows they are 1% effective with a general lowering of the immune system. In general, the most thorough analysis on all the flu vaccine data was reported in the British Medical Journal article entitled Influenza Vaccination: Policy Versus Evidence, which gives evidence from a systematic review based on a metaanalysis of all the research showing that inactivated vaccines have little or no effect. The paper states most studies are of poor methodological quality and little comparative evidence exists on the safety of these vaccines. It shows that in children under 2 years, inactivated vaccines had the same field efficacy as placebo.

Efficacy is a difficult word because it can simply mean the stimulation of antibody production, but we are talking about it in terms of protecting you against the flu, which is not the same thing. In this context, survey research done by one of the Tree of Life master's students on 520 people showed a 92% decrease in incidence of colds and flus in people who were on a healthy plant-source-only diet for two years. We have ample clinical evidence and hundreds of testimonies which show that adequate vitamin A, vitamin D, vitamin C, as well as the use of medicinal herbs and mushrooms can significantly reduce the occurrence of colds and flus far more effectively than a vaccine without all the potential serious side effects that these vaccines can cause—including obviously death, Guillain-Barre syndrome (a demyelization of the nervous system that can paralyze a person from the neck down), rheumatoid arthritis, a variety of autoimmune diseases, type 1 diabetes, and autism (which used to be 1 in 20,000 is now approximately 1 in 67 to 1 in 150 since the onset of mass vaccinations). In other words, the risk/benefit, which is how we assess these kinds of medical decisions, are horrendous. The risks are very high and the benefits are minimal...and we have much more effective and safer options.

“FIRST DO NO HARM.” —HIPPOCRATES

If you feel the risks are high and the actual scientific proofs of benefits are low...and therefore do not want to take the risk...and prefer that others around you do not take the risk (and increase the likelihood of spreading the live virus to you)...there is another obstacle in the path to sovereignty over our own body and mind:

8. THOSE WHO REFUSE SWINE FLU AND REGULAR FLU VACCINATIONS WILL BE JAILED OR HELD INDEFINITELY IN INTERNMENT CAMPS BY THE SO-CALLED SWINE FLU EPIDEMIC BEING CLASSIFIED AS A STAGE 6 PANDEMIC, ALLOWING INTERNATIONAL LAW TO ENFORCE MARTIAL LAW.

The United States Emergency Medical Powers Acts and Federal legislation, including the Patriot Acts I, II and III, BARDA and others provide for mandatory vaccination or drugging. No exemptions (religious or otherwise) are provided. Those who refuse will be classified as felons at the State level, subject to immediate incarceration and quarantine of indefinite length in jails or other facilities reserved for such "vaccine refusers." In a frightening "Big Lie" propaganda move, those who doubt the effectiveness of unproven, uninsurable vaccines are being called "Vaccine Resisters" and being equated to a new form of "terrorism." Fortunately this desperate attempt to quash reasonable and scientific disagreement and alarm has not been successful.

Those who refuse at the Federal level will be subject to immediate incarceration and quarantine of indefinite length, probably in FEMA camps already set up across the US.

That means that untested, potentially lethal vaccines and dangerous drugs like Tamiflu could be forced upon people who do not wish them and who would face incarceration or worse if they choose not to accept them. The CDC has said that there would be no exemptions and that there would be "a certain amount of human wastage".

We are urging you to write your congressmen and senators about the importance of allowing voluntary self-quarantine in the home. We are also writing to tell you to pay particular attention to your diet and are urging you to take immune enhancing mushrooms, herbs, and nano-silver combinations, which are effective immune builders and anti-virals. Such protocols are available at <http://www.treeoflife.nu/whybirdflu.html> and in Mike Adams' book: How to Beat the Bird Flu. Please keep in mind: there are more parents, grandparents, health professionals, and clergy who are concerned about our health than there are people concerned about making money off vaccinations, and/or depleting the world population, etc. whatever theory one may have. If you want to know more about the theories of why this genocidal behavior is being attempted, please see the websites of [Dr. Leonard Horowitz](#), [Mike Adams](#), and/or [Natural Solutions](#).

It may be useful to consider the teachings of Thomas Jefferson:

“WE HOLD THESE TRUTHS TO BE SELF-EVIDENT: THAT ALL MEN ARE CREATED EQUAL; THAT THEY ARE ENDOWED BY THEIR CREATOR WITH CERTAIN UNALIENABLE RIGHTS; THAT AMONG THESE ARE LIFE, LIBERTY, AND THE PURSUIT OF HAPPINESS.”

Pursuit of happiness includes health. A person who is not healthy is less likely to be happy and when they are not healthy they have less willpower against slavery. As Thomas Jefferson said, “THE CARE OF HUMAN LIFE AND HAPPINESS, AND NOT THEIR DESTRUCTION, IS THE FIRST AND ONLY OBJECT OF GOOD GOVERNMENT.”

9. UNITED STATES GOVERNMENT ATTEMPTS TO INCREASE THE DEMAND FOR FLU VACCINATIONS THROUGH FEAR AS EXPLICITLY REVEALED IN A CLASSIFIED CDC SPONSOR CONFERENCE FOR VACCINE MANUFACTURER EXECUTIVES ENTITLED “7-STEP RECIPES TO INCREASE DEMAND FOR FLU VACCINATION”.

Finally, it feels like the will of the US government and the WHO are trying to create a world health government that simply doesn't acknowledge the sovereign rights of an individual over their own body. There was even a clandestine CDC sponsor conference for vaccine company executives that actually taught a “7-step Recipes to Increase Demand for Flu Vaccination”, which specifically documents techniques designed to frighten people about influenza and increase vaccination rates. Because of this attempt to undermine our consciousness and ability to thoughtfully make healthy sovereignty choices over our body is so blatant, it highlights the contradiction between what they say and what is happening. They are attempting to override our right to individual health by creating a bogus definition of pandemic and therefore using it as an

international justification to use potentially lethal, untested, unethical, uninsurable, ineffective, and lethal or life-destroying use of vaccines on the public. This live virus vaccine may actually be the key to setting off an pandemic. We know quite well that by building a healthy immune system using herbs, nano-silver, medicinal immune building mushrooms, eating healthy food, focused prayer, and using aromatherapies, which were the only things successful during the black plague, will people have a much higher chance of surviving. A research paper by a master's student in the Tree of Life Live Food Plant-Source-Only master's program who did an internet interview of 520 people on an 80% live food organic diet found that 92% of the people reported less flus and colds. As in all situations a healthy immune system and a sovereign healthy person is the key to health and the prevention of disease. As one should be able to see from this whole discussion, the activity of the WHO (World Health Organization) with its Codex plan, Codex, etc. all supported by the highest levels of the US government is one through this particular Swine flu vaccination, attempts by Codex to out law supplements, organic foods, and even organic farming (recent attempts stopped by the public action of American citizens of bills 475 and 825, are concerted efforts to undermine our immune systems and the quality of our lives.

10. THE BEST WAY TO BE PROTECTED FROM ANY FLU INCLUDING THE H1N1 SWINE FLU IS TO HAVE A HEALTHY IMMUNE SYSTEM BY LIVING A CULTURE OF LIFE, NATURAL, EARTH-CONNECTED WAY OF BEING, WHICH INCLUDES: ORGANIC, PLANT-SOURCE-ONLY FOODS, SUPPLEMENTS INCLUDING NANO-SILVER, MEDICINAL IMMUNE-BUILDING HERBS, SPECIFIC AROMATHERAPY OILS. THESE HAVE BEEN HISTORICALLY PROVEN TO BE FAR MORE EFFECTIVE AND SAFER THAN CULTURE OF DEATH GENERATED VACCINES WHICH TRULY HAVE NOT BEEN SCIENTIFICALLY PROVEN TO BE EFFECTIVE EXCEPT FOR BUILDING THE ECONOMIC POCKETS OF THE VACCINE COMPANIES. THIS OF COURSE GIVES US A TASTE FOR THE LARGER PICTURE OF WHY THE GOVERNMENT HAS SPENT OVER 1 BILLION DOLLAR IN THIS SWINE FLU VACCINE DEVELOPMENT AND WHY THE VACCINES ARE NON-INSURABLE AND PEOPLE CAN NOT SUE THEM FOR THE DAMAGES THE VACCINES HAVE AND WILL CAUSE. IT ALSO EXPLAINS WHY THE WHO (WORLD HEALTH ORGANIZATION) AND THE U.S. GOVERNMENT SUPPORT CODEX, WHICH IS TRYING AND HAS ALREADY TRIED TO OUTLAW SUPPLEMENTS, ORGANIC FOOD, AND ORGANIC FARMING—INCLUDING YOUR OWN PERSONAL GARDEN AROUND THE WORLD. IN OTHER WORDS, THERE ARE STRONG INTERNATIONAL AND NATIONAL VESTED INTERESTS ON MANY LEVELS BACKING THESE INADEQUATELY TESTED VACCINES, WHICH HAVE NOT BEEN PROVEN SAFE OR EFFECTIVE. THESE VESTED INTEREST GROUPS ARE NOT EXACTLY CONCERNED ABOUT YOUR HEALTH.

11. WE HAVE OPTIONS OF ACTION ...AND WE CAN CREATE MORE.

1. Send this letter as well as the petition to everyone you know to raise consciousness, as very few people understand what is really going on and the severity of the situation. We have power in numbers.
2. Contact congress people and senators with mass emails and direct discussion supporting our right to refuse this potentially disastrous, deadly immunization and to support our right to build healthy immune systems with the use of healthy food, supplements, nano-silver, and herbs. We have a constitutional right to sovereignty over our own bodies and

our healing. Thomas Jefferson taught that sovereignty in a true democracy means having the right to choose our own medicines, herbs, and remedies that we deem necessary for our body and for our children; and when and if the government tries to usurp that power for its own agenda we lose sovereignty, health, and democracy and the government loses its validity.

3. Sign the enclosed petition, which at the appropriate time and with the appropriate numbers will be given to congress people and senators.
4. “Self-Shielding”—Assert the right to self-quarantine in your on home.
5. Leave the country. Note: communities are developing outside of the US that will continue the energy of the Culture of Life ([COL Nicaragua](#), [Mike Adams’ Vilcabama, Ecuador](#), and [Natural Solutions in Panama](#)).
6. Go numb. Feel hopeless. And take the shot.

“LIBERTY IS TO THE COLLECTIVE BODY, WHAT HEALTH IS TO EVERY INDIVIDUAL BODY. WITHOUT HEALTH NO PLEASURE CAN BE TASTED BY MAN; WITHOUT LIBERTY, NO HAPPINESS CAN BE ENJOYED BY SOCIETY.” –Thomas Jefferson
